Protest Filed by: Mat Beck DS - 67 - Subaru BRZ	Protest against: Charles Krampert DS - 94 - Toyota GR86
--	--

Section Protested: 13.5.A.2 or 13.8.B - Shock allowance/alignment adjustment compliance

Protest Description:

From a visual inspection of the upper strut bolt insert on a fellow 86 owner's MCS shocks, I believe their insert may not be compliant with the Street Category Shock Rules, section 13.5.A.2 or 13.8.B (I'm not sure which one this falls under). There are several 86 (GR86 or BRZ) D-Street competitors that are running Motion Control Suspension 2-Way adjustable shocks, as well as myself and my codriver in the #67 and #167 Subaru BRZ (Although #67 is listed in the registration as a Toyota GR86). Of all of the MCS-equipped cars apart from the #94 GR86, the OEM Subaru/Toyota crash bolt head overhangs the upper strut bolt shock ear insert by what appears to be 0.5 to 1.0mm (as checked via a visual inspection while the cars had the wheels off in impound). On the #94 GR86, the shock ear insert appears to be flush with the bolt head, or possible sticking out from under the bolt head (pictures included - the aluminum knuckle is my BRZ and the steel knuckle with the shim sticking out is the #94 GR86). I am not sure if this is compliant, and didn't get a good look at the part (or good pictures) as after I saw the part, I walked back to my car to grab my phone to take a picture. When I came back to the #94 car with my phone, the competitor had the front wheel back on the car. I apologized before asking him to remove the wheel to get a better look at the part, and he told me that he would not remove the wheel and that I had "run out of time" and he didn't have to remove the wheel. He then told me that I could take a picture of the part through the wheel spokes, which I have included. As an aside, I believe that it is very difficult to ensure compliance of competitors in a very large class like D-Street - which had 79 competitors - in the time allowed. Charles was one of the last cars to remove his wheels, and put them back on immediately after I walked away.

If his part is found to be non-compliant, or not the "stock" MCS part, but the measurement from the strut bolt centerline to the strut centerline is found to be correct, I would like clarification if running a non-MCS "stock" part (the upper strut ear insert) is legal, if the measurements are compliant. I believe that all of the other MCS equipped cars are running the "stock" MCS part as this is what the rules state.

I do not wish to be promoted up a space in the final results if his strut insert is found to be not compliant.

Protest Committee Decision:

Competitors are reminded that it is their responsibility to verify that any aftermarket parts installed conform to the rules outlined in section 13.5. The end-user may be required to perform modifications to aftermarket parts in order to comply with 13.5. This may include changing the size and / or location of mounting holes to ensure that no suspension geometry changes (i.e. changes in negative camber) result from the installation of those parts.

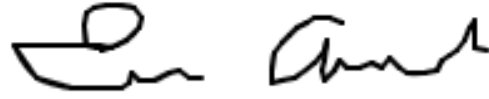

Protest was withdrawn.

Protest Report

Protest Filed: 06-Sep-2023 11:27:01

Protest Filed by: Ryan miles Xs - 138 - Porsche gt	Protest against: Chief of sound N/A - - Sound
---	--

Section Protested: Appendix H sound measuring at national events

Protest Description:

The sound meter was not placed on course in accordance with the manual for the measuring device. The meter can not be placed in a box or a basket. The manual describes the only 4 use cases for the meter, which all include the meter box being placed vertically. There are no orientations allowing the meter to be placed flat for the numbers to be read from above, or inside any kind of enclosure or basket.

Protest Committee Decision:

Sound meter on the East Course was not configured as directed by the user manual for the meter. Barring in-depth knowledge of the ANSI Type 2 standard, we can only follow the manufacturer's recommendations to ensure compliance with that standard.

After the protest party made officials on the East Course aware of the improperly configured meter, it was reconfigured to be as close as possible to one of the four recommended configurations.

The PC recommends that National Staff consult the manufacturer's documentation and confirm that the meter is being configured and used in a manner consistent with that documentation.

Protest is upheld.

Section Protested: 8.6

8.7

8.8

Protest Description:

Results were sent out and announced by Angela Carlascio as audited. None of the competitors were informed that a protest was in process. Trophy ceremony commenced and was completed.

It was only after the awards were handed out that [potential] affected parties were alerted of the situation. The rule book states that distribution of awards must be withheld until everything is finalized.

None of the results were marked with a time or set of initials.

Reasonableness- reasonableness was absolutely ignored here. It is completely unreasonable to announce that results are audited, do an awards ceremony without following proper process with affected competitors, distribute awards, then take them away.

Additionally- paper results were never brought to my attention at any point in this situation.

Protest Committee Decision:

Protest withdrawn by protestor.

Process changes were implemented immediately following discussions with protestor to ensure appropriate review of results prior to trophy presentation(s) occurred.

Protest Report

Protest Filed: 07-Sep-2023 17:50:48

Protest Filed by: Brian Maskrey STX - 198 - Scion FRS	Protest against: Tyler Salminen STX - 88 - Scion FRS
--	---

Section Protested: 14.10.F.1.d

Protest Description:

14.10.F.1.d does not authorize additional sensors to be added. Car 88 STX has a flex fuel sensor installed. Seeking clarity on limitations for flex fuel sensors in STX

Protest Committee Decision:

The protest committee examined the vehicle and took a fuel sample to test. Test results showed approximately 13% ethanol which is within expectations of standard pump gas.

The vehicle does have an E85 kit installed. Competitor stated that the vehicle is also driven on track days and he does run E85 and the appropriate tune when participating in that.

There was no attempt to hide the sensor and since the fuel is clearly not E85, the PC determined that while the part is not legal, there is no performance effect.

Protest was found to be well founded and was upheld. No penalty assessed. Protest fee will be returned.
